
VOLLEYBALL, BADMINTON POSTS, GYMNASIUM FLOOR SOCKETS

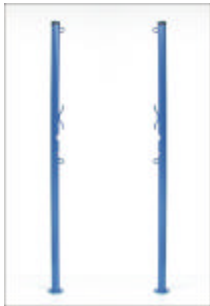

This innovative design finally offers a Volleyball standard that is made for the typical 2" diameter floor socket while standing up to the required net tension for competitive play. This computer aided design responds to every desirable feature combining a unique lightweight aluminum construction and zero flex technology.

Competitive level volleyball is now accessible without the costly need to Convert floor sockets to 3" or 4" diameter.

TW300 Volleyball Winch uses a wide 2" flexible strap to adjust net tension for competitive play. Winch contains a self locking worm gear contained inside a patented steel frame for high rigidity and precise alignment, semi enclosed for corrosion resistance. Winch is to be placed onto 3" or 3 1/2" Volleyball Posts. For other size posts please call for Prices.

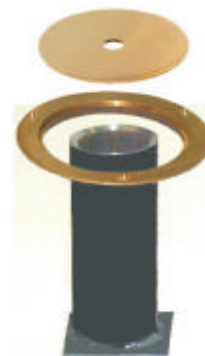

Badminton Posts are constructed of 1.9 O.D. Tubing and are complete with a powder coat finish

Floor Sockets are available for Fixed or Floating Wood Floors Installations.

Fixed Floor Sockets are of Bronze and are designed for use with all standard Volleyball and Badminton Posts

Floating Floor Sockets are used to relieve the expansion and contraction that takes place in a floating floor. It is a three part socket consisting of a bronze lid & ring with a steel floor socket cast into the concrete floor. This socket is designed for use with all standard volleyball posts
