
MODEL 720

The Model 720 Wall Side Fold Basketball Backstop folds up in a compact position against the wall. This is a very economical, but stable unit. The Model 720 is used specifically where a folding unit is required and the wall structure can accommodate. Units cannot exceed 10'-0" (3050mm) in length. The Model 720 is recommended for use where a fixed wall unit cannot be used due to the position of court lines

MODEL 721

The Model 721 Wall Fixed Basketball Backstop is a very economical, but stable unit. The Model 721 is used specifically where a folding unit is not required and the wall structure can accommodate. Units cannot exceed 12'-0" (3658mm) in length. The Model 721 is recommended for use where a folding unit is not required and there will not be any interference due to the position of court lines
