## MODEL 722

Canadian Arena Products

The Model 722 Wall Fixed Basketball Backstop is a very economical, but stable unit. The Model 722 is used specifically where a folding unit is not required and the wall structure can accommodate. Units cannot exceed 3'-0" (915mm) in length. The Model 722 is recommended for use where a folding unit is not required and there will not be any interference due to the position of court lines
