December 6, 2001

Dear Renee,

On behalf of Balwin Community and our residents, I wish to commend you and your company on the quality of service and product you have provided to us with our new rink system. This project was very close to many of us as it was possible only through many years of dedicated volunteer hours and fundraising efforts.

It was apparent, upon our initial research, that your current applications at sites we had the pleasure to view were superior to your competitors for many reasons. That impression was solidified upon invitation to your manufacturing facility. The integrity and confidence that was displayed by all of your associates convinced us we were contracting with the best of all our options.

The result has been an outdoor arena that will service a multitude of families for years to come with minimal maintenance by Balwin Community. The top quality workmanship, product and service have provided us with the enhanced security that can be rare in today's society.

I wish to thank each and every one of you who so diligently contributed to provide the youth of North East Edmonton with an arena unsurpassed by any. The security of entrusting your experienced and knowledgeable staff has been an experience we will remember for some time.

Special thanks to Dan, Al and the crew.....

Sincerely

Maureen Acheson
