**RE: Letter of Recommendation on Work Performance**

We would like to take this opportunity to report on the current work performance, commitment to safety, and quality of the work of Canadian Arena Products Ltd.

Canadian Arena Products Ltd. has worked for the City of Wetaskiwin Facilities department over the past summer on the Arena One upgrade. They have been involved with all the installation of the arena boards. We have never been apprehensive about their work performance as it has always been outstanding and if the City crews or myself needed something done or changed their crews were very willing to help us in anyway they could.

We feel that Canadian Arena Products Ltd. is a leader in the industry; they have shown on every occasion that quality is at the top of their agenda.

We have worked with other firms in this field and Canadian Arena Products Ltd. is a company that is committed to quality work and we have enjoyed working with their employees. We can always count on a helpful and pleasant response from any company representative.

If you have any questions on this matter please contact me at 780-361-4440

Sincerely

A handwritten signature in blue ink, appearing to read 'D. Jaburek'.

David Jaburek, Facilities Foreman
